A conversation is when two people talk to each other about something they have in common or something that interests them.

Talking together is how people make and keep friends.

People have conversations with friends, family members and teachers.

When you want to start a conversation with someone you need to:

- **Walk up and stand arm's length away**
- **Look the person in the eye**
- **Say “Hello, Hi or How are you?”**
- **Talk about things you have in common**

You can be friendly with family members, teachers, friends and other students at school by having conversations.
